SUBJECT: ATLAS SUPPLIER FAIs IN NET-INSPECT   November 19, 2019

ATTN: Quality Manager

Dear Supplier,

Effective December 1, 2019, in accordance with requirements from our customers, we will require that all First Article Inspection Reports (FAIRs) must be submitted through Net-Inspect.
Net-Inspect, a web-based application has become quite standard in our industry (chances are you're already using the program with other customers). Net-Inspect has been our preferred method of handling FAIRs for several years, but will now become our one method of handling all First Article submissions. This requirement also holds for any FAIRs rolled up or submitted from your sub-tier suppliers.

If you already have a Net-Inspect license, simply add the appropriate Atlas company/companies (e.g. PMC and WASI) as your customer and proceed with FAIs. If you don't have a license, Net-Inspect allows you to use our license (obviously for use with us).

The correct accounts to reference are:
BRENNER: Brenner Aerostructures - Bensalem
FMI: FMI Incorporated - Wichita
PMC: Product Manufacturing – Wichita
VITRON: Vitron Manufacturing - Phoenix
WASI: Wichita Aerospace Spares – Wichita

If you are new to Net-Inspect, all you need to do is go to the main page and select the Net-Inspect Account Sign Up page: https://www.net-inspect.com/v5/contact#tab1

From there, you will fill out the form and the Net-Inspect helpdesk will have you up and running in a day (or two). During this process you will identify one (or more) of the Atlas companies as the customer (as noted above) and Net-Inspect will set those up.

For general information on Net-Inspect – or to access their FAQs and knowledge base, you can go to:
http://www.netinspect.com/

For training and issues with the Net-Inspect program, please utilize their help desk. For other questions or concerns, feel free to contact your Atlas Supply Chain contact or me.

Respectfully,

Mark Kofford   Curtis Sullivan
